1. Confidentiality Statement

The information and data embodied in this document are confidential and are supplied on the understanding that they will be held confidential and will not be disclosed to third parties without the written consent of:

- The Administrators of Occupational & Medical Innovations Ltd (Administrators Appointed) ACN 091 192 871 ("OMI Ltd / the company"), the holding company;
- The Liquidators of OMI Manufacturing Pty Ltd (In Liquidation) ACN 101 137 464 ("OMI Manufacturing"), a wholly owned subsidiary; and
- The Liquidators of OMI Research Pty Ltd (In Liquidation) ACN 092 084 805 ("OMI Research"), a wholly owned subsidiary.

All parties who have received this information memorandum have executed a confidentiality agreement which precludes the following market sensitive information being released to persons not approved by the Administrators and Liquidators.

2. Disclaimer

The contents of this information memorandum is believed to be accurate however, because information either verbal or written given in respect of the business ("information") has been supplied by third parties and the contents of this information memorandum is in reliance of this information, please note:

- No assurance is given by the Administrators and Liquidators that the information in this document is accurate, complete or balanced.
- You should satisfy yourself as to the accuracy and completeness of the information in this document through inspections, surveys, enquiries and searches by your own independent consultants.
- If you make an offer or sign a contract for the business, you will be taken to be not relying on any information in this document (unless otherwise agreed in a written contract with the vendor).
- Information in this document will not form part of a contract.
- This disclaimer does not exclude any statutory rights you may have, which cannot be excluded.

The information has been compiled from books and records of OMI Ltd, OMI Manufacturing and OMI Research. This information has been gathered from public sources such as the Australian Securities and Investments Commissions ("ASIC") and Australian Stock Exchange ("ASX"), statements from the directors of the abovementioned companies, private company information and information obtained from professionals who represented the companies prior to our appointment.

3. Introduction

We, Terry Rose and David Stimpson were appointed Joint and Several Administrators of Occupational & Medical Innovations Ltd on 31 December 2009 and Joint and Several Liquidators of OMI Manufacturing Pty Ltd and OMI Research Pty Ltd on 6 January 2010.

Our appointment over the holding company was preceded by the loss of a legal action commenced by a competitor, Retractable Technologies Inc ("RTI"). This saw the jury hand down a verdict for damages payable by the company in the vicinity of US\$4 million dollars for patent infringement in the US. The judgment (due to be handed down on 3 March 2010) will rule on a final damages amount and whether RTI can obtain injunctive relief against the company in the US. If successful, OMI will be prevented from selling the auto retractable safety syringe in the US market.

The directors believe the company has a chance of appeal as it is alleged the jury did not return the verdict as a matter of law, but based on the controlled facts presented by RTI's legal team. The key points that were raised by OMI but were disallowed in the US case were in summary:

1. That RTI previously challenged OMI Ltd on patent infringement and misuse of trade secrets in Australia. In that case, the Court ruled in favour of OMI; and
2. That RTI's and OMI's retractable safety syringes were extremely different in look and application.

Since our appointment, investigations have been undertaken into the requirements of the company to lodge relevant motions and respond to RTI's motion for injunctive relief. The judgment on damages and any other motions submitted by the parties is scheduled to be handed down on or before 3 March 2010. Until judgment is handed down, the damages verdict is a contingent unsecured debt of OMI Ltd.

The assets of the OMI consolidated group are available for sale. We have ensured that relevant manufacturers, distributors and competitors of the company both domestically and abroad have the opportunity to submit an expression of interest prior to 19 February 2010.

4. Assets of the OMI Consolidated Group

4.1 Patent Registrations

The core products of the OMI group are:

Auto Retractable Safety Syringe

OMI Valve

OMI Safety Scalpel

Developed products

Auto-Retractable Safety Syringe ("ARSS") that is patented in Australia, Brazil, Canada, China, Greece, India, Italy, Japan, Korea, South Africa, United States of America and several countries in Europe. An International patent application was commenced by the company prior to our appointment.

This product increases safety through automatically retracting into the syringe plunger while the needle is being removed by the muscle tissue. Available in sizes 0.5ml, 1ml, 3ml, 5ml and 10ml. Improvements to this product has also been patented in the abovementioned countries with the addition of New Zealand.

The core market for the ARSS is the US market due as legislative requirement place a quota of 25% use of safety syringes by medical operators. The directors expect a number of other counties to follow suit.

OMI Safety scalpel is patented in Australia, Brazil, Canada, China, India, New Zealand, South Africa, United States of America and several other countries in Europe. It is designed to reduce the risk of contaminated blade cut injuries suffered by healthcare workers (surgeons) through a protective guard that covers the blade ensuring safe loading, passing, changing and disposing of the blade. It's available as a fully disposable unit or a reusable surgical steel handle with disposable scalpel cartridges with blade configurations available in a range of #3 and #4 fitment sizes.

There are agreements in place for the manufacture and distribution of the scalpels however, we have been advised by the directors that this product has not enjoyed the same success as the ARSS. Additionally, as there are no requirements for safety scalpels to be used by medical professionals, we are unable to gauge the potential success of this product.

Developing Technology

Safe IV Value is patented in Australia, India, Japan, New Zealand and United States of America with applications for patents for Brazil, Canada, South Africa and several other European countries. It offers positive fluid displacement, leaving minimal fluid inside the valve and an easily swabbed access port. The valve features high flow rates and minimal dead space. Importantly, the valve is compatible with Luer slip and Luer lock devices.

Safe IV Catheter is patented in Australia, Canada, China, United States of America and several other European countries. The auto-retractable technology in ARSS has been applied to the safety IV catheter and will enhance the safety of healthcare workers when introducing intravenous catheters into patients. Through the automatic reaction of the cannula safety into the chamber, the incidence of contraction of blood borne pathogens through contaminated sharps injuries could be significantly reduced.

Patented designs yet to be developed

Retractable needle for catheter is patented in Australia, China and several other European countries with applications for patent made in United States of America and Canada.

Apparatus transport cylinder is patented in Australia.

A needle free access valve is patented in Australia, China and United States of America.

Medical syringe container is patented in United States of America with applications being made in Australia and Brazil.

Syringe removable needle is patented in Australia and Pakistan with application made in China.

Shoot back needle has an International patent application.

One way valve that uses fluid pressure to open/close valve has a patent application made for China.

A listing of the patents and the remaining useful life of each is **attached marked Annexure A**.

4.2 Trademarks

The “OMI” and “OMI Sharp safe” logos registered with IP Australia on trademark: 898812 with class 10 for surgical and medical apparatus and instruments which are as follows:

This trade mark is due for renewal on 21 December 2011.

4.3 Other Registrations

The following registrations with the Therapeutic Goods Administration (“TGA”) in 2004 for medical devices have been obtained:

- ARTG # 130691ARSS: which confirms that the product meets the relevant standard conferred by the TGA Act 1989 and that the product is able to be imported into Australia from the Chinese manufacturer.
- ARTG# 99159 & 99073 Scalpel: which confirms that the product meets the relevant standard conferred by the TGA Act 1989 and that the product is able to be imported into Australia from the Chinese manufacturer.
- ARTG# 13083 unclassified product: which confirms that the product meets the relevant standard conferred by the TGA Act 1989 and that the product is able to be imported into Australia from the Chinese manufacturer.

These registrations ensure Australian compliance and enable the products to be distributed in Australia.

4.4 Manufacturing and Distribution Agreements

The contracts for distribution and manufacturing are summarised as follows:

<i>Agreement</i>	<i>OMI Product</i>	<i>Company</i>	<i>Country</i>
Distribution	Safety Syringe 0.5ml, 1ml, 3ml, 5ml & 10ml	Cardinal Health	North America
Distribution	Safety Syringe 0.5ml, 1ml, 3ml, 5ml & 10ml	Endomed Medical & Surgical Supplies	South Africa & Namibia
Distribution	Safety Syringe 0.5ml, 1ml, 3ml, 5ml & 10ml	Domrex Pharma Inc	Canada
Distribution	Safety Syringe 1ml, 3ml, 5ml & 10ml	City Pharmacy Co	United Arab Emirates

<i>Agreement</i>	<i>OMI Product</i>	<i>Company</i>	<i>Country</i>
Manufacturing	Safety Syringe 0.5ml, 1ml, 3ml, 5ml & 10ml	Zhejiange Vitalcare Medical Devices Co Ltd	All
Distribution	Scalpel all types	Personna Medical	Australia, NZ, Europe
Manufacturing	Scalpel all types	Suzhou SPR Medical Devices Development Co Ltd	North America
Supplier	Scalpel blades	Swann-Morton Ltd	All
Commercialisation Agreement	of the Scalpels	Southmedic Incorporated	North America

These agreements indicated that they were assignable and that in order to terminate, six months written notice was required to be issued by either party. To date, no written notifications to terminate the agreements have been received.

The directors have advised that the Chinese manufacturer for the ARSS invested several million dollars in the moulds and tooling to produce the product to OMI specification. Accordingly, the company does not appear to hold a right to these assets. However, this does not appear to be the case with the Chinese manufacturer for the OMI Scalpel.

4.5 Plant & Equipment

The plant and equipment located in Australia consists mainly of office equipment, a leased office and factory situated at Slacks Creek (currently on a month to month tenancy). These fixed assets have been valued and any encumbered assets have been disclaimed by the Administrators and Liquidators. A listing of the plant and equipment available for sale is **attached marked Annexure B**.

4.6 Other Assets

Other available assets comprise, the listed company shell, assistance with securing the fully signed and fitted out business premises located at Slacks Creek, Queensland and a minimal amount of unbranded stock held in Australia.

It should be noted that all key staff have been terminated, however, they are still contactable should an interested party wish to re-employ former staff associated with the group of companies.

5. Financials

Annexed to this information memorandum **marked Annexure C** are the financial statements for the OMI consolidated group for the financial periods ending 30 June 2006, 2007, 2008 and 2009. Financial statements for the group are available electronically through ASX or ASIC for prior financial periods.

The directors have advised that in the last two financial years, the sale of the developed products have entered the growth stage, primarily due to the manufacturing and distribution agreements entered into from 2004 onwards and the increasing requirements in the medical profession for safety equipment.

In order to adequately assess expected future earnings of the products, we have provided an adjusted consolidated profit and loss statement for the last two financial periods which identifies net operating profit.

<i>OMI Consolidated Group</i>	<i>Year ended 30/6/2009</i>	<i>Year ended 30/6/2008</i>
Sale of Product	2,014,755	1,512,782
Other income	749,036	126,531
<i>Total income</i>	<i>2,763,791</i>	<i>1,639,313</i>
Less: COGS	(1,029,504)	(658,386)
<i>Net profit</i>	<i>1,734,287</i>	<i>980,927</i>
Less: Expenses	(6,401,499)	(3,370,451)
Finance Costs	(87,588)	(59,201)
<i>Gross Profit / (Loss) before Tax</i>	<i>(4,754,800)</i>	<i>(2,448,725)</i>
Income tax benefit	255,517	257,130
<i>Gross Profit / (Loss) after Tax</i>	<i>(4,499,283)</i>	<i>(2,191,595)</i>
Add: Accounting fees	64,022	58,222
Bank charges / Finance Costs	87,588	59,201
Computer & capital acquisitions	21,105	30,170
Consultants Fees	642,220	849,116
Depreciation	77,748	108,803
Director fees	1,218,945	1,200,669
Legal fees	3,433,881	109,299
Legal settlements	-	-
Listing fees	107,110	83,172
Other expenses	179,071	290,849
Patent fees	244,327	119,752
Printing & Stationery	7,897	38,103
Property costs	82,776	82,370
Travel & Accommodation	188,460	243,376
<i>Net operating Profit / (Loss)</i>	<i>1,855,867</i>	<i>1,081,507</i>

The financials indicate that the company has not made a profit in the relevant financial periods specified above. The loss experienced from trading activities has been supported over time from debt and equity financing, related party financing and research and development grants.

The costs of development of the technology, maintaining the patents and testing the products have been expended by the company with the core products developed and available for market sale. Speculating on this developed technology would be capitalising on the investment already made by the consolidated group to date.

The financials reflect the patents at a cost value at \$19,685,603, which has been offset by accumulated amortisation and impairment of \$15,885,603. Accordingly, the net book value of the patents as at 30 June 2009 is recorded as \$3,800,000.

We acknowledge that the patents associated with the company maybe devalued due to the negative outcome of the RTI legal action, however, this only affects the ability to sell one OMI developed product in one market (the US market) and there are several other markets available to this core product. Additionally, the other developed and developing products are also available to market to both overseas and domestic markets.

In this respect we acknowledge some limitations in converting the patented technology to marketable products, however, the patents have been valued as intangible assets, separate and independent from the company and in this regard, it is not required for OMI Ltd to be considered as a going concern for the value to remain.

6. Expressions of Interest

We are seeking expressions of interest for the business and stock on a “as-is, where-is” basis. Accordingly, in order to submit an offer, please complete the **attached** form and lodge with our office by **5:00pm, Friday 19 February 2010**.

Should you have any queries in relation to the business or wish to attend the premises, please contact Nicky Lonergan of this office on 07 3310 2004 or nicky.lonergan@svp.com.au.

Yours faithfully

DAVID STIMPSON
